INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP2003/014996

Box No.	I Basis of the report	
1. With r	regard to the language, this report is based on the international application in the language in which it was filed, unless wise indicated under this item.	
	This report is based on translations from the original language into the following language which is language of a translation furnished for the purpose of:	-,
	international search (under Rules 12.3 and 23.1(b))	
	publication of the international application (under Rule 12.4)	
	international preliminary examination (under Rules 55.2 and/or 55.3)	
furnis	regard to the elements of the international application, this report is based on (replacement sheets which have to shed to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally five not annexed to this report):	been led"

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/JP 03/14996

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Statement			
Novelty (N)	Claims	1-36	YES
	Claims		NO
Inventive step (IS)	Claims	1-14, 18, 19, 24, 27-36	YES
	Claims	15-17, 20-23, 25, 26	NO
Industrial applicability (IA)	Claims	1-36	YES
	Claims		NO

2. Citations and explanations

Document 1: JP 2001-220805 A (Toto Ltd.), 17 August 2001, paragraphs [0114] to [0139]; fig. 9 and 10

Document 2: CD-ROM of the specification and drawings annexed to the Japanese Utility Model
Application No. 10766/1993 (Laid-open No. 71578/1994) (Toto Ltd.), 7 October 1994, paragraphs [0007] and [0008]; all drawings

Document 3: JP 8-260551 A (Inax Corporation), 8 October 1996, entire text; all drawings

Claims 15, 17, 20 to 23, 25 and 26

The inventions set forth in claims 15, 17, 20 to 23, 25 and 26 do not involve an inventive step in the light of documents 1 and 2 cited in the international search report. It would be easy for a person skilled in the art to conceive of applying the feature set forth in document 2, wherein the internal diameter of the entirety of the passage inside the drain socket body to be made at least as large as the internal diameter of the trap drain passage outlet, to the drain socket having a guide groove formed on the narrow part of the passage. The number, depth and width of guide grooves set forth in document 1 are matters which could be selected as necessary by a person skilled in the art.

PCT/JP 03/14996

Claim 16

The invention set forth in claim 16 does not involve an inventive step in the light of documents 1 to 3 cited in the international search report. It would be easy for a person skilled in the art to apply the feature set forth in document 3, wherein a wider part of the passage is provided on the upstream side of a narrow part of the passage, to the drain socket set forth in document 1.

Claims 1 to 14, 18, 19, 24, and 27 to 36

The invention set forth in claims 1 to 14, 18, 19, 24, and 27 to 36 involves an inventive step in relation to the documents cited in the international search report. These documents do not disclose a feature of having a straightening plate provided in such a manner so as to extend from the inner wall surface towards the inside of the passage upstream of the siphon inducing portion of the drain socket body, or a feature of forming a siphon inducing shelf which extends in at least the opposite direction of the eccentric direction on the downstream end of the wider part of the passage.
